

How To: Replace the front foglight bulbs

so a couple of days ago i ordered Phillips diamond vision h7 bulbs for my headlights.
in the meanwhile i got myself the same set for the fogs (h1)

so here is the process....

the cover under the bumper

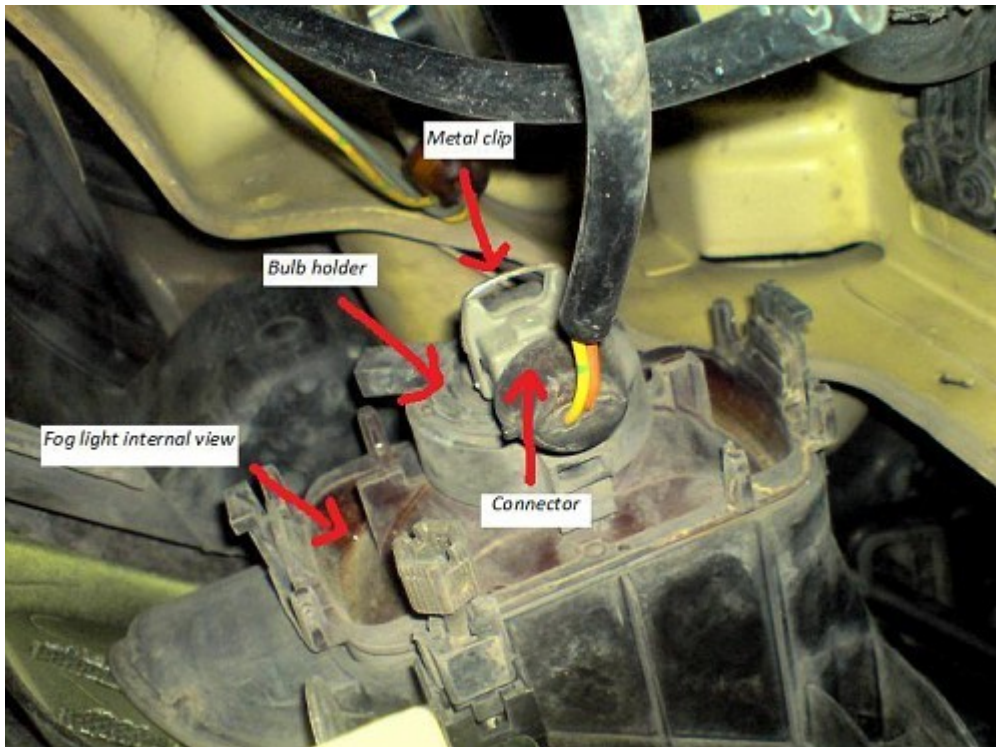

pic of its location from front

the cover goes out by 3 bolts, here it is on the floor

look from the inside without the cover

without the metal clip+the connector

a little twist aside, and the light comes out

new lights

new light is on...

original "yellow" light

new bulb on the left side of the pic,
old bulb on the right side of the pic.

few more pics of the new set.
