

# How To: Upgrade windscreen washer jets.

After one of my washer jets went I decided to upgrade to the Citroen ones - it really is a five min job and hopefully this guide will allay any fears of changing for a non-standard part.

Citroen part number is 6438V8 - I paid £2.54 each plus VAT (but I live in central London so you may be able to get them cheaper elsewhere).

Right - here are the bits:

Open the bonnet and disconnect one of the pipes (don't worry - not much fluid comes out).

I found that prising a small screwdriver under the front of the old jet whilst pushing from underneath was the best method of removal (don't forget to protect the paintwork):

The new one just clips into place and the pipe fits back on a treat:

Repeat for the other side and voila:

The jet covers the windscreen a treat:
